

COMBINED CLADDING SOLUTIONS

FLEXIBILITY IN SERVICE

With the use of a BRANZ tested polystyrene cavity system (system 300) or with any other substrate; your project can be completed from a single supplier and applicator. (see adjacent picture as example.)

MASONRY SUBSTRATES - New or Existing?

Plastabrick provides a finishing system for all masonry substrates. Whether it be an old painted block surface, a new masonry villa, light weight concrete and of course brick, we can provide you with the unique texture finish of your choice.

RE-CLADDING

Plastering over your older home will increase its market value and add a whole new dimension to the architecture. Whatever the substrate, be it brick, weather board, or Hardies, Plastabrick has the ability to adapt an exterior texture solution to enhance your house.

Contact us for your local Plastabrick applicator who can provide you with ideas and a no obligation, free quote.

COMPANY OVERVIEW

Products and Services – Plastabrick continues to develop new ideas and adapt to the requirements of the NZ Building market. Plastabrick provides for all types of substrates e.g. brick, polystyrene, harditex/cement sheet, masonry villas, aerated concrete & lightweight concrete, and many more.

LICENSED APPLICATORS

Plastabrick has a licenced applicator base who participate in training and site supervision prior to maintaining a license. A Plastabrick Licensed applicator will provide you with a quotation directly (contact Plastabrick for your local licenced applicator), or you can send your plans to the addresses below and you will be forwarded the contact details of either your local applicator or we shall point you in the direction of the applicator who best suits your requirements.

WARRANTY

All plaster products supplied by Plastabrick come with a 15 year Warranty.
